## Information for electronic & online articles

### From a full text database

- Include the Database name and the internet address.
- Examples of full text databases include Applied Science and Technology, Academic Search Complete, and ProQuest, to name a few.

When including the internet address of articles retrieved from searches in full-text databases, please use the **Recommended URLs for Full-text Databases**, which are the URLs for the main entrance to the service and are easier to reproduce.

### From the internet

- Unlike journal articles from full text databases these are often freely available on the internet.
- Some publishers offer recent issues for free and earlier issues for a subscription fee.
- Include the complete internet address.

## IEEE Format: Online & electronic articles

### Standard format for citation:

[#] A. Author, "Title of Article," *Title of Journal*, vol., no., p. page numbers, month year. [Format]. Available: Database Name (if appropriate), internet address. [Accessed: date of access].
